

# Just in Time Computer Aided Training

Cap Sant International offers a variety of computer aided training programs from on-the-job training with fingertip access Ipad e-Manuals to complete course/certifications.

## Basic Reference

*When used as a quick-reference source the user can directly access information from easy to use interactive menus and has the ability to access “drill down” links to learn greater detail or on a variety of related information. This product promotes in-depth familiarization of key knowledge at the touch of the finger.*

## E-Manuals

*When used as an advanced e-Manual, the technician or watchstander can review critical maintenance routines or procedures via a “Just in Time” job aid. Step-by-Step procedures and caution indicators can be accessed via interactive menus and viewed quickly and easily via audio and video clips.*

## Course/Certification

*When used as a structured or linear training aid, the product can register the student and track their learning and comprehension of the materials throughout the learning process. The application is self-paced, which ensures the student has the opportunity to achieve the highest retention of the materials. Frequent self-testing requires the student to “get it” before advancing to higher level learning modules. The application will monitor progress, and document training through-out the student’s progression. This training is scalable and suitable for a classroom of multiple students or individuals.*

# Reference Manuals at your Fingertips

Features like our handy Ipod-based reference manuals and training courses allow workers to access valuable information on-site.

## **Video clips**

*SME topic descriptions in 1-2 minute segments*

## **Key Points**

*Simplified textual descriptions*

## **Popup Notes**

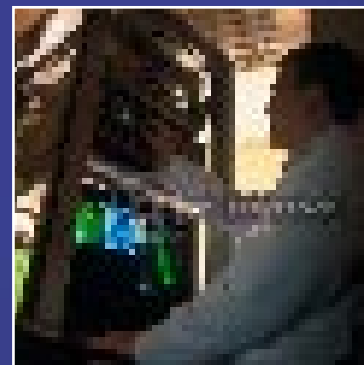

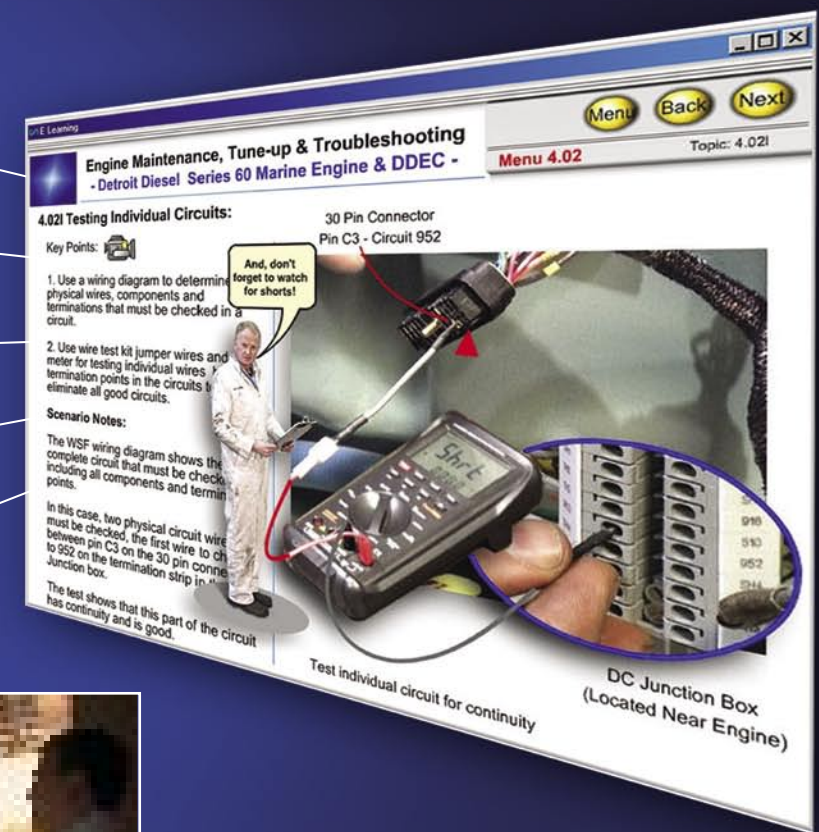

*Used for adding detailed information without cluttering up the screen*

## **Photographs**

*Photographs include SME cutouts with talk bubbles to emphasize points*

## **Interactive Animations**

*Used to engage the student in the topic*

*E-manuals offer quick reference and procedure information that allows workers to stay on-site with less down time.*
